ABSTRACT:

Higher education has never been more accessible, and there have never been more options for every type of budget, learning style, and goal. Having so many options is great, with one caution. Students have to decide where to pursue their goals. It's a big decision, and it can be hard to find quality and pertinent information to help you on their way. For this reason, we provide the most current research and reviews on the best University and online programs. Our goal is to foster dialogue between the most current educational data, the analysis of educational leaders. For us, it's a job well done for every student that we can help achieve their goals.

INTRODUCTION

Reviews general-

The reviews that you can find on various websites are personal assessments that students and alumni can leave regarding their student experience at a certain higher education institution. They are a combination of ratings and text descriptions. Through these reviews, we are addressing actual experiences from current students or alumni.

Who can write reviews?

Current students or alumni of a university can leave a review on our portals. To respect students' privacy, we also allow the option to leave a review anonymously.

How are reviews collected?

We ask students and alumni that we're in contact with to rate their experience in several areas. The way we get in touch with students is via multiple channels, such as institutions, via our ambassadors and directly through our portals.

What gets reviewed?

> Students and alumni can rate the institution, the programme, their social life (e.g. living costs), and their overall experience. Additionally, they can write specific comments about their experience.

How is our webapp helping other students?

Our research has shown that students want to know how other students experienced studying for a specific programme. This helps them to make a more informed choice based on their personal needs.

For universities, reviews can be a valuable opportunity to show and share more aspects of their institution and programmes, as well as receive direct, constructive feedback on their curricula and campus offers.

What determines the quality of a review?

Ensuring quality of reviews

We aim for the following criteria to make sure reviews are ready to be published:

- Reviews have to include at least one of the four required areas: the institution, the program, social life or overall experience.
- Text-wise, reviews should have a minimum length of 20 characters.
- Reviewers should have studied at their institution with a maximum 5 years ago (as of today).
- The respondent has agreed to the privacy terms regarding exposing their review on our portals, thus the review can get published.

What an admin can do if a review seems to be illegitimate?

Any written reviews may be checked by admin before exposing, automatically or manually, because admin wants to make sure only high-quality reviews are being exposed. We only remove reviews in the following situations:

- In case admin or another organisation or institution can prove a respondent did not study at the reviewed institution or program.
- When the review includes abusive language, swearing, discriminatory remarks, threatening, or personal political, sexual, religious, and ethical viewpoints.
- When the review promotes illegal or commercial activities.
- In case the review is written by the reviewer 5 or more years after they studied at the institution.
- When reviews are not the personal experience or opinion of the respondent.
- If reviews are repeatedly pointed on a personal level at fellow reviewers.
- If reviews are exposed in a repeatedly disturbing way.
- If it includes contact details like phone numbers, addresses or links to other websites.
- If reviewers pretend to be another person or organisation than itself.
- If we suspect that a review isn't genuine; for example, might be used to target a competitor.
- If a review contains content that violates the rights of another person or organization, intellectual property rights and privacy rights.
- Reviews entered by the threat of extortion.
- If a review doesn't contain information about the university or programme in detail.

Our users are active and engaged students who feel strongly about sharing their experience with others. They want to give back and contribute to the decision-making process of other students. Currently, most published reviews are positive regarding institutions or programmes.

We also have strict criteria put in place that helps us assess the quality of a review. If the criteria are not met, the review will not be published.

How does the review system work?

We ask students to rate their experience based on a range of factors such as programme, institution, social life and overall experience.

We strive for high-quality reviews that help other student in their choice. This means comprehensive, relevant, and informative evaluations.

Approved and published ratings will appear on programmes and university pages alongside any extra comments which students share.

Responding to reviews

Can institutions reply to reviews?

Currently, it's not possible for an institution to respond to a review. We are working to enable a function to have your answer added to a particular review. You can share your comments with your Campaign Manager, and they will take it from there.

Why should an institution have reviews on another platform and not their own?

Through the reviews left on Study portals, your institution gets a chance to accumulate what is known as third-party reviews. These reviews add a layer of trust to your brand and reputation, because they are written in a more neutral space, that references you, but is not owned by you.

If you already have a review-collecting system and would like to have a review that objectively reflects studying at your institution submitted to Study portals, please contact your campaign manager.

Can a negative review be removed?

> To be transparent, we choose to publish all complete reviews, regardless of the rating. If the rating itself is fairly low or expresses a negative opinion, the review content can be just as valuable for students, as well as for the institution itself.

DESIGN/ IMPLEMENTATION:

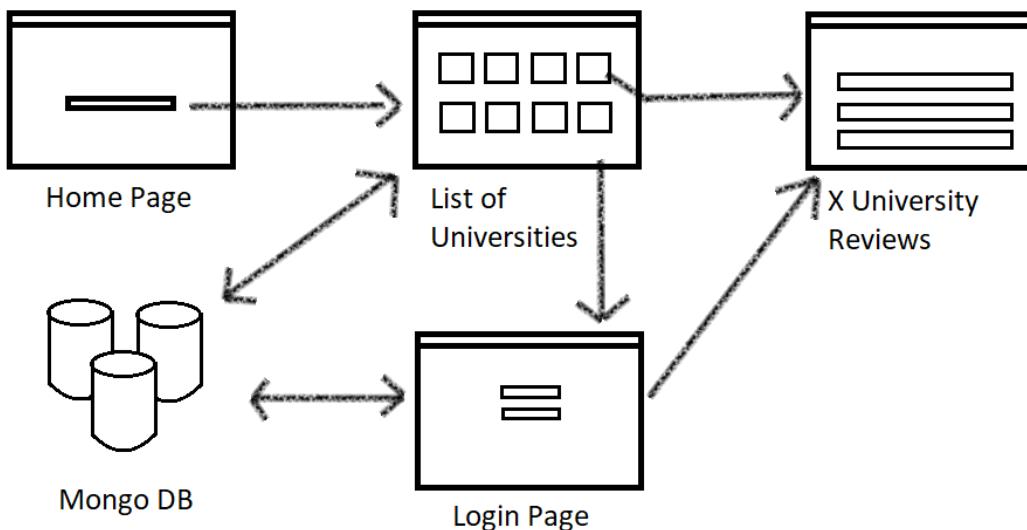

The project first starts with the login page where the Usn and the Password is collected and sent to the database named urp using Php. If not logged in, we can click on the register button to register our details and then log in.

When we log in to the main page, we are taken to main.php where the different functionalities are available. These include add university ,edit reviews ,view universities . All these are shown in the navigation bar.

On clicking of a particular university, we get the university details taken from the stored database. A window is then given where we can type our reviews.

Our favorite reviews can be saved. The Support and tools provide the contact details and the conditions applied.

A simple flowchart is shown to show the path of problem solving.

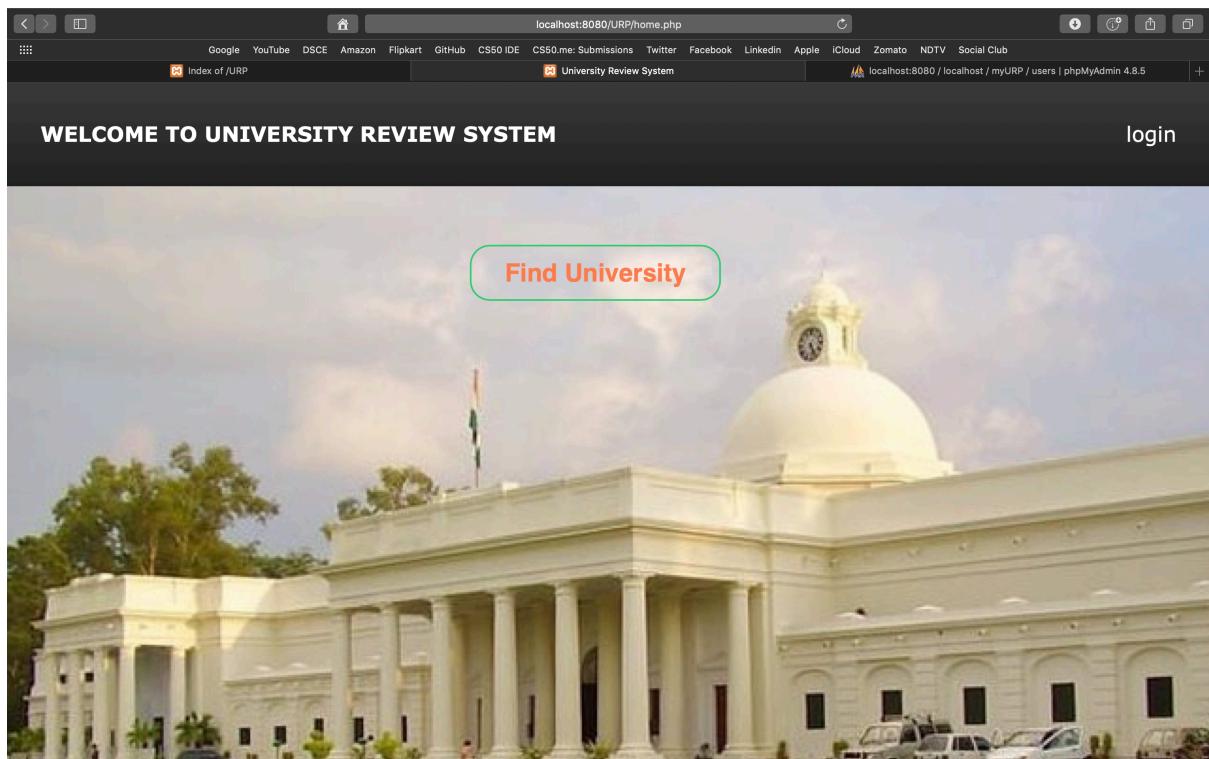

Home, login, About, Contact are also the additional functionalities available.

Clicking on Home button directs to the official home page of the University Review System.

Thus, this helps in creating an organized way in solving any query asked by the student.

The following shows the code of the website created:

RESULT AND ANALYSIS:

The screenshot shows a web browser window with the URL `localhost:8080/URP/universities.php`. The title bar reads "WELCOME TO UNIVERSITY REVIEW SYSTEM". On the right side, there is a "login" link. The main content area features an orange background with a grid of university names and their locations. The grid consists of two columns and eight rows. The data is as follows:

Dayananda Sagar Institute	Bangalore
Peoples Educational Society	Bangalore
Osmania University	Hyderabad
Delhi University	Delhi
Harvard University	Cambridge, Massachusetts
Princeton University	Princeton, USA
Yale University	Haven, CT USA
Rv college	Bangalore

localhost:8080/URP/universities.php?university_id=1

Dayananda Sagar Institute

BANGALORE

Reviews:

Amit	Placements : Placements are fine here. Approximately 150 companies like Accenture, TCS, Wipro, Google, Mercedes and many more visit this college. The highest package offered was 13 LPA, the average was around 8 to 10 LPA, and the minimum package was 3 LPA. Overall, placements are good and satisfactory. Infrastructure : Our college has good infrastructure records. The library has been well designed. Labs are not only well designed but comprise lots of new equipment. The environment is also fine here at the college. All of the professors are highly qualified. Faculty : Faculty members are highly qualified. Some of them have doctorates as well. Our faculty members are very helpful. They are always there to solve your doubts. There is a proctor meeting also for all of the students. Overall, faculty members are fine here.
Ataa	new review
Nishant	There is a good number of labs, classrooms, proper facilities and proper comforts required by an ideal educational institution. Overall it has a really good infrastructure I must say.
sourav	teachers are good

Write a Review:

Submit

The screenshot shows a web browser window for the University Review Portal. The URL is `localhost:8080/URP/universities.php?university_id=1`. The page features a large image of a stadium or sports field. Below the image, the text "Dayananda Sagar Institute" is displayed, followed by "BANGALORE". A section titled "Reviews:" contains four entries:

A button at the bottom says "Login in to write a Review".

The screenshot shows a login page with a dark background and white text. The title is "LOGIN". It includes a "Remember Me" checkbox, a "Submit" button, and a "Register" link.

The screenshot shows a registration page with a dark gray background and white text. The title 'REGISTER' is centered at the top. Below it are four input fields with rounded corners: 'Username', 'Email_id', 'Password', and 'Confirm Password'. A 'Submit' button is located below the password field. At the bottom center is a 'Login' link.

The screenshot shows a list of universities with their names and locations. A modal dialog box is overlaid on the page, containing fields for 'University Name' and 'University Location', along with 'Cancel' and 'Add' buttons. The table data is as follows:

Dayananda Sagar Institute	Bangalore
Peoples Educational Society	Bangalore
Osmania University	Hyderabad
Delhi University	Delhi
Harvard University	Cambridge, Massachusetts
Princeton University	Princeton, USA
Yale University	Haven, CT USA

CONCLUSIONS AND FUTURE ENHANCEMENT:

Hence, There are lot of Professional Universities, to decide the suitable University for your professional field we need a proper unbiased Review System for all the Universities. An online university Review Portal finds its application in the General public. It serves as an all-Inclusive Information and unbiased reviews by the public serving the students find their dream University

Future Enhancement:

- By following this procedure and with the help of AI, the machine can thus sort the queries by itself and remove spam questions or alert the user.
- We can add more functionalities which include most viewed reviews and trending news about the curriculum and various other details of the university.
- The queries can further be segregated based on country and courses offered .
- We can add live chats with respect to most mentioned problems by the faculty incharge of various reputed universities.
